• *Created a blog website using Next.js for server-side rendering.*

Experience

Freelance MERN Stack Developer

2020 - 2024

• Developed and deployed multiple web applications using the MERN stack for various clients.

• Collaborated directly with clients to understand their requirements and translate them into technical solutions.

• Implemented responsive designs using Next.js and Tailwind CSS to create visually appealing user interfaces.

• Integrated backend services with MongoDB databases and supabase to manage and store application data efficiently.

• Utilized version control systems such as Git to manage project repositories and facilitate collaboration with clients.

• Provided ongoing support and maintenance for deployed applications, including troubleshooting and bug fixes.
